

## 12.2/12.3 Surface Areas of Prisms, Cylinders, Pyramids and Cones

Target: Use properties of 3-D figures to solve problems

Lateral of a Prism

$$L.A. = Ph$$

Surface Area of a Prism

$$S.A. = Ph + 2(\text{Base Area})$$

Lateral Area of a Cylinder

$$L.A. = 2\pi rh$$

Surface Area of a Cylinder

$$S.A. = 2\pi rh + 2\pi r^2$$

Lateral Area of a Regular Pyramid

$$L.A. = \frac{Pl}{2}$$

Surface Area of a Regular Pyramid

$$S.A. = \frac{Pl}{2} + \text{Base Area}$$

Lateral Area of a Cone

$$L.A. = \pi rl$$

Surface Area of a Cone

$$S.A. = \pi rl + \pi r^2$$

Surface Area of a Sphere

$$S.A. = 4\pi r^2$$

Find the lateral area and surface area of each prism.

1.

$$LA = 42(15)$$

$$LA = 630m^2$$

$$SA = 630 + 2(110)$$

$$630 + 220$$

$$SA = 850m^2$$

2.

$$LA = 24(12)$$

$$LA = 288ft^2$$

$$SA = 288 + 2(24)$$

$$SA = 288 + 48$$

$$SA = 336ft^2$$

**12.2/12.3 Surface Areas of Prisms, Cylinders, Pyramids and Cones**

Target: Use properties of 3-D figures to find lateral area and surface area

**Lateral Area of a Prism** Find the lateral area of the prism. Round to the nearest tenth.

$L.A. = Ph$

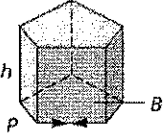

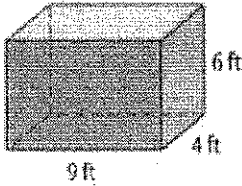

$6^2 + 6^2 = x^2$   
 $36 + 36 = x^2$   
 $x = 7.8$

$P = 7.8 + 6 + 5$   
 $P = 18.8 \text{ cm}$   
 $LA = 18.8 (\pi)$   
 $LA = 131.6 \text{ cm}^2$

**Surface Area of a Prism** Find the surface area of the rectangular prism.

$S.A. = L.A. + 2B$

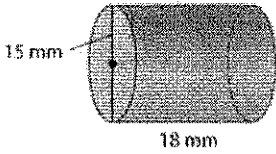

$P = 4 + 9 + 4 + 9$   
 $P = 26$   
 $LA = 26(6)$   
 $LA = 156 \text{ ft}^2$

$SA = 156 + 2(9 \cdot 4)$   
 $SA = 156 + 2(36)$   
 $SA = 228 \text{ ft}^2$

**Lateral Area of a Cylinder** Find the lateral area of the cylinder. Round to the nearest tenth.

$L.A. = 2\pi rh$

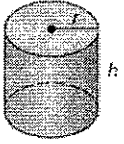

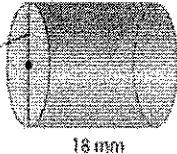

$r = \frac{15}{2}$   
 $r = 7.5$

$LA = 2\pi(7.5)(18)$   
 $LA = 847.8 \text{ mm}^2$

**Surface Area of a Cylinder** Find the surface area of the cylinder. Round to the nearest tenth.

$S.A. = L.A. + 2\pi r^2$

$LA = 2\pi(7.5)(18)$   
 $LA = 847.8 \text{ mm}^2$   
 $r = \frac{15}{2} = 7.5$

$SA = 2\pi(7.5)(18)$   
 $SA = 847.8 + 2\pi(7.5)^2$   
 $SA = 1201.2 \text{ mm}^2$

### Lateral Area of a Regular Pyramid

$$L.A. = \frac{Pl}{2}$$

Find the lateral area of the square pyramid.

$$L.A. = \frac{16(6)}{2}$$

$$L.A. = 48 \text{ in}^2$$

### Surface Area of a Regular Pyramid

$$S.A. = L.A. + B$$

Find the surface area of the square pyramid to the nearest tenth.

$$16^2 + 6^2 = l^2$$

$$256 + 36 = l^2$$

$$\sqrt{292} = \sqrt{l^2}$$

$$l = 17.08$$

$$SA = 48 \frac{(17.08)}{2} + 144$$

$$SA = 553.92 \text{ cm}^2$$

### Lateral Area of a Cone

$$L.A. = \pi r l$$

Find the lateral area.

$$16^2 + 12^2 = l^2$$

$$256 + 144 = l^2$$

$$400 = l^2$$

$$l = 20$$

$$L.A. = \pi(12)(20)$$

$$L.A. = 753.98 \text{ ft}^2$$

### Surface Area of a Cone

$$S.A. = L.A. + \pi r^2$$

Find the surface area of a cone with a diameter of 14.8 centimeters and a slant height of 15 centimeters.

$$r = \frac{14.8}{2}$$

$$r = 7.4$$

$$S.A. = \pi(7.4)15 + \pi(7.4^2)$$

$$= 348.71 + 172.03$$

$$SA = 520.7 \text{ cm}^2$$
